Protests

---

# Safety

---

**Top priority for OOD:** ultimate decision on whether to run race lies with OOD acting on behalf of club

**Considerations:** wind, weather forecast, tide, safety boat cover, skill of competitors, no. of competitors, other estuary users.

**Red-Amber-Green:** card in race box with critical information on how to deal with accidents, safety issues. CHECK if conditions are marginal for race

# Risk too high? - options

---

cancel immediately

declare a postponement - wait to see if conditions change  
(be clear about decision time)

impose constraints to limit the risk (though often  
self-constraining)

Be prepared to abandon race

keep competitors informed

# Abandoning a Race

---

Red Beacon - Three (long) beeps

Inform safety boats

- Inform boats on water
- Abandon capsized boats decision
- Stay afloat until everyone confirmed ashore

Confirm everyone is ashore against entry list

R-A-G sheet if someone missing

# Types of Race - Scoring

---

**Level** - single class racing

**Handicap** - same as level but results calculated on handicap (local or national)

**Average lap handicap** - as for handicap but different finishing procedure

**Pursuit** - completely different finishing and results procedure

Currently all club races are either average lap or pursuit race scoring

# Types of Race - Starcross YC

---

Trophy Race - 2 starts, monohull then multihull

Club Series Race - 5 starts (assy, hcap, laser, multi, junior)

Evening Series Race - 3 starts (fast, slow (<1020), multi)

Pursuit Races - class start times calculated for each race (depends on current PNs, length of race, and scratch boat)

All other races “should” have specific Sailing Instructions - and if using racemanager a defined format

# Fair Courses

---

Not absolutely possible for mixed classes!

for a single race anyway

... but somewhat possible for Series racing

# Elephant in the room: PN numbers

---

A short history of the PY system:

## **Nationally**

- <1995 - OK but slow to respond to change
- 1995-2010 - outpaced by technical development and new classes
- >2010 - moved to online system and removal of most damping factors

## **At Starcross YC**

- 2000-2006 - considerable gnashing of teeth and rumbling in the ranks
- 2006 - changed to local adjustment of RYA numbers using racemanager statistics
- 2016.. - RYA system has caught up - back to national numbers

# Fair Course Setting - relative performance

---

**Wind:** slow boats have advantage in very light, fast boats in windier, until it becomes very breezy

**Tide:** fast boats have big advantage against tide, slow boats have smaller advantage with tide (more time spent upwind so this leg tends to be the most important for tide)

**Rig:** una-rig tend to over-achieve on fetch/close reach, symmetric spinnaker on runs, asymmetric on broad reaches

# Fair Course Setting - Multiple Courses

---

## **Trophy Races [Pursuit Races]**

**Monohull** - “round the cans” with a variety in downwind angles

**Multihull** - large “mostly” windward /leeward

## **Series Races**

**Asymmetric** - windward/leeward

**Handicap / Laser / Junior** - “round the cans” with a variety in downwind angles

**Multihull** - large “mostly” windward /leeward

# Course Setting goals - Windward/Leeward

---

Trying to maximise the strategic options for the competitors

Incorrect judgement of tide or wind direction can be disastrous

Think carefully about position of 29 and its impact on the race

WEST/EAST winds - hard to do effectively - consider rectangle

# Course Setting goals - “Round the Cans”

---

Biggest impact on fairness is downwind - try for equal distance on beam reach, broad reach, run

P, or quadrilateral courses often work well

# Course Setting Tips - Preserving Sanity

- Consider how tide and wind forecast will affect race
- Minimise multihull and monohull sharing buoys if possible
- Try to limit tactical impact of having to cross club line
- Make sure you can clearly see sail numbers as boats cross line
- Check water depth - aim for > 1.2m for whole race (BA, LL)
- Use the safety boats to help judge positioning of windward mark + watch boats sailing
- If wind direction in doubt - include two beats
- Use the special line option more

# Tidal Adjustment

---

# Be prepared to change

---

Don't stick with a poor course if you can see that it is wrong after boats launch

Postpone - 2 beeps + AMBER flashing light

Flag C  + 2 beeps

Reset Course (inform safety boats, then change course board)

Lights off + 1 beep [Leave Flag C flying]

Commence start sequence after 1 minute

# Signals

---

<b>ABANDON / CANCEL</b>	<b>RED Beacon</b> <ul style="list-style-type: none"><li>- with fleet light(s) if necessary</li><li>- Cannot cancel before scheduled start</li></ul>	3 beeps
<b>POSTPONE</b>	<b>AMBER Beacon</b>	2 beeps (at start) 1 beep (at end)
<b>SHORTEN</b>	<b>AMBER Beacon</b> <ul style="list-style-type: none"><li>- with fleet light(s) if necessary</li></ul>	2 beeps
<b>RECALL</b>	<b>AMBER Beacon</b> (off after 1 min)	1 beep
<b>GENERAL RECALL</b>	<b>RED Beacon</b> (off after 1 min) <ul style="list-style-type: none"><li>- Restart 3min after last fleet</li></ul>	2 beeps

# Using the Systems

---

## **Lights and Sound System [“Lights Box”]**

- Start sequence
- Light signals
- Sound signals

## **PC System [“raceManager”]**

- Collects entries and allocates them to correct fleet
- records laps and elapsed time (finishing position)
- produces results (race and series) + posts to website

# Lights Box

---

Check it is configured for the correct number of starts  
(trophy race - 2, evening series - 4, club series - 5

If you are using it for the first time - check the labels on  
the buttons

If you are running two races - to reset after first race,  
turn power off at wall for 30 seconds and then back on

# Lights Box

-----

# Sign on PC

---

Turn power on at wall - it should start up automatically in about a 1 minute

If system error screen - usually an internal battery issue. Click the option to proceed - F1

Check display has today's races displayed

Enter yourself

After race - turn off power at wall

# raceManager Demo

---

... and if it all goes  
pear shaped

STOP using the computer  
and record finishing  
times from the wall clock

- don't close the race
- contact Michael Bagge

---

# Protests

## Rules Dispute Process

OOD only has powers to score:

- OCS
- DNF
- DSQ - not sailing proper course (SYC amendment to RRS)

Otherwise OOD can protest

---

# SYC Rules Dispute Process

- Details on website with link to online form - PDF form on PC in race box
- Encourage Advisory process if significant damage has not occurred - can accept exoneration penalty as result [code as XPA]
- Otherwise Protest - find someone from protest subcommittee to get the process started
- Advisory/Protest request MUST be made within 30 minutes of last boat finishing
- Do NOT reject request if protest was not hailed on the water
